## DETAILED ACTION

### *Drawings*

1. The drawings were received on 9/14/07. These drawings are acceptable.

### ***Allowable Subject Matter***

2. Claims 1-21 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art does not disclose or suggest "a plurality of heat-generating resistor assemblies, each heat-generating resistor assembly including a pair of heat-generating resistors, a respective one of the plurality of heat-generating resistor assemblies being disposed in a respective chamber, wherein the main controlling unit is operative to individually control an amount of heat of the heat-generating resistors of each one of the plurality of heat-generating resistor assemblies, the amount of heat generated in one heat-generating resistor of at least one pair of the heat- generating resistors being different than a remaining one of the at least one pair of the heat- generating resistors" in combination with the remaining claim elements set forth in claims 1-4 and their dependent claims. Further, the prior art does not disclose or suggest "individually selecting for said each liquid discharger one of the directions as a reference direction, or setting a discharge angle of the droplets independently for each liquid discharger, and discharging the droplets from the nozzle in the selected direction as the reference direction and set discharge angle by individually controlling an amount of heat of the heat- generating resistors of each one of the plurality of heat-generating resistor assemblies, the amount of heat generated in one heat-generating resistor of at least
